Surface Finishing Solutions

About Mirka

Mirka Ltd is a global company and part of the family owned KWH Group Ltd. Mirka's business idea is to offer world leading comprehensive surface finishing solutions.

Our business focuses on our customers' needs. Continuous improvements of our operations, our expertise and our work with our customers help us to offer tailored

systems and commercial comprehensive solutions that are supported by a wide range of technically superior abrasives and polishing products as well as innovatively designed tools.

97% of our products are exported and sold across the globe through our subsidiaries and importers in more than 100 countries.

Our main production facilities, head office and R&D are situated on the West Coast of Finland in Jeppo

For more information, please visit **www.mirka.com**

Corporate Responsibility

Responsibility is part of Mirka's identity and a natural part of our business operations. Through ongoing development of our operations we are able to offer our customers innovative and comprehensive solutions for surface finishing, taking into consideration the environment, social responsibility and economic viability. Our mission states that we want to give people the opportunity to perform better.

Our Clean Commitments:

✓ **Clean Performance:** We strive to improve our economic, social, and environmental performance – results speak louder than words.

✓ **Clean Proactivity:** We proactively look for ways to reduce the environmental footprint of our products.

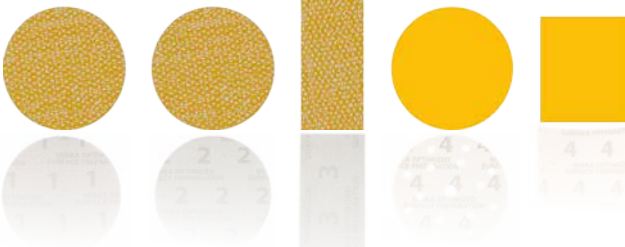

✓ **Clean Production:** We strive to make our production safer, cleaner and smarter – without wasting resources.

✓ **Clean Partner:** We strive to take care of employees, customers, end-users and suppliers better than anyone else.

GOLDEN FINISH

- A unique, fast and simple post paint solution
- Standardised step-by-step process ensures consistent high quality
- Sanding in two steps for a smooth, uniform surface
- Polishing in two steps for the perfect high-gloss finish
- Includes microproduct for sanding small defects and micro fiber cloth for finishing touches
- Recommended tools: Mirka DEROS 650CV for sanding, Mirka AOS-B 130NV for spot repairs and Mirka PS 1437 for polishing
- The special elastic foam gives a high cut performance and a long lifetime
- The waffle shape removes all remaining haze and leaves a very high gloss

ABRALON®

- Unique foam based product for an ultrafine surface finish
- Recommended for high gloss applications
- Recommended for various solid surface materials
- Leaves a very smooth surface finish prior to polishing
- Speeds up the high gloss process
- Leaves uniform scratches easy to polish out

ABRALON® J3

- Unique, multifunctional Abralon abrasive for an ultrafine surface finish
- J3 has a higher density (62 kg/m²) foam layer, which is only 3 mm thick
- Recommended for high gloss applications, leaving a very smooth surface prior to polish
- Suitable for all kinds of material, both smooth and profiled surfaces
- Achieves a smooth, even surface faster while minimizing the risk of pressure marks
- The flexible weave allows water and air to pass freely, suitable for both dry and wet sanding

Technical Specifications

Adhesive	Modified Acrylic
Backing	Knitted fabric on foam
Bonding	Special resin
Coating	Special ABRALON® method
Color	Grey
Foam density	62 kg/m ²
Foam thickness	3 mm
Grain	Silicon carbide
Grit range	180, 360, 500, 600, 1000, 2000, 3000, 4000

Unique multifunctional abrasive with higher density foam layer which is only 3 mm thick. Suitable for all kinds of material for high gloss applications.

Abralon® J3 – ideal for high gloss applications.

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

ABRALON® J5

- Unique, multifunctional Abralon abrasive for an ultrafine surface finish
- J5 has a higher density (62 kg/m²) foam layer, which is 5 mm thick
- Removes minor defects and flattens the surface for a superior finish
- Suitable for all kinds of material, both smooth and profiled surfaces
- Achieves a better cut and longer lifetime, while minimizing the risk of pressure marks
- The flexible weave allows water and air to pass freely, suitable for both dry and wet sanding

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

ABRANET®

- Multi-purpose net abrasive for dust-free sanding
- Extremely long life due to the net structure (up to 10 times longer than conventional abrasives)
- Recommended for various wood types, paints and lacquers
- Speeds up the surface finishing process
- Well suited for various solid surface types
- Suitable for all sanders regardless of hole configuration

Technical Specifications

Backing	PA net
Bonding	Resin over resin
Coating	Closed
Color	Brownish
Grain	Aluminium oxide
Grit range	P80-P180, P240, P320-P1000

ABRANET® ACE

- The unique ceramic dust-free experience
- Recommended for various hard surfaces, where long life time is needed
- The ceramic grains give a good cutting ability on various materials
- Excellent cutting properties
- Suitable for all sanders despite different hole configurations
- Excellent for cleaning of different industrial rollers

Technical Specifications

Backing	PA net / PES net
Bonding	Resin over resin
Coating	Closed
Color	Light maroon
Grain	Ceramic/Ceramic coated
Grit range	P80-P240, P320-P1000

Net with integrated grip attachment enables dust-free sanding. Long lasting, does not clog. Ceramic (P80-P240)/Ceramic coated (P320-P1000).

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

ABRANET® ACE HD

- Unique ceramic net abrasive for dust-free heavy-duty sanding
- Ceramic grains give great cutting ability, recommended for hard surfaces
- Strong net structure resists high wear and tear
- Ideal for heavy-duty applications
- Suitable for all sanders, regardless of hole configurations

ABRANET® MAX

- Abranet Max is an universal product suited for a broad variety of sanding applications
- Due to the net structure, lower pressure is needed when sanding and the product does not easily clog up
- The tough aluminium oxide grain gives a high cut rate on harder wood types and materials
- The product offers extreme long lifetime compared to conventional products, which results in less belts needed for the job
- Less downtime in production due to changing of belts leads to cost savings
- More consistent surface finish means minimal quality variations in the process

Unique net abrasive for dust-free sanding. Universal product suited for a broad variety of sanding applications and especially developed for the wood industry.

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

ABRANET® NC

- Non-corrosive (NC) net abrasive for sanding aluminium/painted aluminium parts that may not be contaminated with corrosive agents
- Significantly lower heavy metal content than corresponding traditional abrasives
- Time-saving and cost-effective dust-free sanding
- Extremely long life due to the net sanding structure (up to 10 times longer than standard abrasives)
- Suitable for all sanders regardless of hole configuration

Flexible stearate coated abrasive for dry sanding applications. Ideal for profile sanding.

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

COARSE CUT

- Ideal product for tough sanding applications
- Progressive bond technology enables high wear and tear resistance
- Ideal for applications where edge wear is important
- Recommended for both soft and hard wood types
- Minimal clogging

Stearate coated abrasive paper for hand sanding of wood, plastic and metal.

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

GOLD NC

- Non-corrosive (NC) abrasive for materials that may not be contaminated with corrosive agents
- Tough, latex-coated base paper makes for a balanced and flexible product, which is both aggressive and durable
- The surface layer of calcium stearate provides good clogging resistance when sanding for instance aluminium
- Suitable for sanding of aluminium and painted aluminium parts within the automotive industry

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

GOLD PROFLEX

- Extra flexible hand sanding product
- Anti-slip paper makes the product more user-friendly and easy to work with
- Ideal for sanding various wood types
- Ideal for intermediate sanding of paints and lacquers
- The stearate coating gives extra long life to the product
- Creates a smooth surface finish prior to coating

Abrasive for sanding of seams and putty, and decoration sanding.

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

IRIDIUM

NEW

- Fast sanding with aggressive initial cut and great stock removal
- Precision coating repels dust; prevents clogging and reduces pilling
- Increased lifetime as grains stay sharp longer with less wear and tear
- Flexible premium paper with low VOC resin has excellent grain adhesion
- Optimized dust extraction with multihole patterned discs and strips
- Efficient sanding of all surfaces for a smooth finish in fewer steps

Technical Specifications

Backing	Latex paper, C-Paper
Bonding	Low VOC resin system
Coating	Semi-open
Color	Grey
Grain	Ceramic/Aluminium oxide
Grit range	40-600

NOVASTAR

NEW

- Efficient sanding with aggressive initial cut, especially in coarse grits
- Precision coating repels dust; prevents clogging and reduces pilling
- Incredibly durable with excellent edge wear resistance
- Great grain adhesion and continuous stock removal
- Optimized dust extraction with multihole patterned discs
- Remarkably flat and smooth surface finish on hard surfaces

Technical Specifications

Backing	Polyester film
Bonding	Low VOC resin system
Coating	Semi-open
Color	Transparent

A new micro product

NovastarTM SR

New spot repair disc with an excellent initial cut for a flawless finish. Like all Novastar abrasives, it's durable, flexible and user-friendly.

S = Standard stock NS = Only available from European Distribution Center. Production order: 3-4 weeks, minimum order quantities apply.

POLARSTAR®

- Film product with silicon carbide grains for extra smooth surface finish
- Recommended for high gloss applications
- Leaves a uniform scratch pattern prior to polishing
- The product is targeted towards harder high gloss lacquers
- Recommended for UV paints and lacquers

Mirka Golden Finish

– fast and simple post paint solution

POLARSHINE® E3

- Water based silicone free polishing compound designed for polishing out scratches on glass surfaces
- Suitable for most glass types and removes marks permanently
- Suitable for both standard window glass and hardened glass
- One step polishing process, should be used together with the Mirka felt pad and Mirka rotary polisher

Technical Specifications

Color	Brownish
Density	1,1 - 1,2
pH	7 - 9
VOC	1

Mirka® DEROS - Electric Random Orbital Sanders

- Award-winning design and innovative brushless electric motor
- Patented power factor correction - unique motor and motor control technology (patented)
- Variable speed control with lever
- Soft start and electric brake of motor
- New models feature integrated vibration sensor and Bluetooth low energy technology
- The myMirka app is available on App Store and Google Play

Mirka® DEOS - Electric Orbital Sanders

- Compact and very light electric sander
- The high efficiency brushless motor exerts plenty of power
- The compact and very low profile gives a high maneuverability
- Excellent ergonomic design ensures that the sander can be used for long periods without fatigue
- Integrated vibration sensor and Bluetooth low energy technology
- The myMirka app is available on App Store and Google Play

Mirka® LEROS - Long Electric Random Orbital Sanders

- The lightest brushless wall sander in its class. Weighs less than 3.5 kg.
- Thanks to 180° flexibility on the sanding head the operator can reach the surface from a better angle and use more ergonomic working positions.
- The random orbital movement contributes to a smoother better finish without leaving any deep visible scratches as with rotating movement.
- T-shaped handle allows the operator to use different working positions and this puts less strain on the operator's back and shoulders.
- The special sanding head and backing pad design permits the operator to sand very close to corners.
- The fixation point of the sanding head is close to the surface and contributes to more stable sanding.

Adapter	Description
	1 Hose Ø 27 mm x 0.5 m + Connector. This conductive adapter enables a quick change in-between Mirka power tools. Fix the adapter on each tool and connect/disconnect to/from any Mirka hose assembly with a Mirka branded adapter, both pneumatic: 8992514511, 8992514711 and electric: MIE6514511, MIE6514711.
	2 Mirka Connector for Air + Electric Hoses. Comes with hose MIE6514511, MIE6514711, 8992514511 and 8992514711.
	2 Connector for Air + Electric Hoses with threads. This adapter is close to the dust extractor, where the pneumatic tube/electrical cable comes out. Comes with hose MIE6514511, MIE6514711, 8992514511 and 8992514711.
	3 Hose adapter Ø 32 mm / 54 mm for Mirka® Dust Extractors. Comes with hose MIE6514511 / MIE6514511US, MIE6514711 / MIE6514711US, MING6519411, MING6519211, 8992514511 and 8992514711. This adapter goes from the hose into the dust extractor.
	4 Hose Connector Kit No. 3-1 and 3-2 for Miro 955° & 955°-S. Adapter for both ends on the hose for Miro. Connector 4b: Ø 54 mm.
	5 Adapter Ø 20 mm / 28 mm for Mirka® Hand Sanding Blocks. Enables using the Ø 27 mm hoses (MING6519411 and MING6519211) together with the blocks.
	6 Soft Connector Ø 25.4 mm. Delivered together with hose MING6519411 and MING6519211. Enables connecting MING6519411 and MING6519211 hoses to Mirka Decosander®, Mirka Dust Suction Hood and sanders of other brands. Not suitable for Mirka® CEROS or Mirka® ROS.
	7 Quick connector Ø 25.4 mm. Delivered together with hose MING6519411 and MING6519211. Enables connecting MING6519411 and MING6519211 hoses to Mirka CEROS, DEOS, LEROS and Dust Suction Hood. Not suitable for Mirka® CEROS or Mirka® ROS.
	8 Hose Swivel Connector Ø 20 mm / 20 mm. Enables connecting two Ø 20 mm hoses. For example: 2 x Ø 20 mm hose x 4 m hose (8391112011).
	9 Hose Connector Ø 32 / 32 mm. Delivered together with extension hose MING6519711. Enables connection with hose MING6519411 and MING6519211. To be discontinued.
	10 Adapter Ø 30-48 mm for Dust Extractor. Can be cut to fit dust extractors of other brands.
	11 Hose Swivel Connector Ø 20 / 25.4 mm. Enables connecting a Ø 20 mm hose with Ø 27 mm hose MING6519411 and MING6519211.
	12 Hose 20 mm x 0.5 m + Connector. This conductive adapter enables a quick change between Mirka power tools with 19 / 20 mm dust extraction fittings. Fix this adapter on each tool and connect / disconnect to / from any Mirka hose assembly.
	13 Connector Air Inlet for Hand Sanding Block 20 / 20 mm. When fixed on a Mirka 20 mm dust extraction hose, this new connector enables a quick and smooth change of the hose from one Mirka hand sanding block to another. This connector enables adjusting the airflow.

ABRANET®

- Multi-purpose net abrasive for dust-free sanding
- Extremely long life due to the net structure (up to 10 times longer than conventional abrasives)
- Recommended for various wood types, paints and lacquers
- Speeds up the surface finishing process
- Well suited for various solid surface types
- Suitable for all sanders regardless of hole configuration

ABRANET® MAX

- Abranet Max is an universal product suited for a broad variety of sanding applications
- Due to the net structure, lower pressure is needed when sanding and the product does not easily clog up
- The tough aluminium oxide grain gives a high cut rate on harder wood types and materials
- The product offers extreme long lifetime compared to conventional products, which results in less belts needed for the job
- Less downtime in production due to changing of belts leads to cost savings
- More consistent surface finish means minimal quality variations in the process

INCOTERMS • Delivery terms

Terms of delivery are in accordance with Incoterms 2010

EXW (Ex Works...)

The buyer is at risk when the goods have been placed at his disposal at agreed time and place.

Insurance to be covered by the buyer. The buyer bears the risk during the whole transport.

FCA (Free Carrier...)

The buyer is at risk when the goods have been delivered to the first carrier or terminal at agreed time and place.

Insurance to be covered by the buyer (the seller up to the named point).

FAS (Free alongside ship...)

The buyer is at risk when the goods have been delivered alongside the ship at the port of shipment.

Insurance to be covered by the buyer (the seller up to the ship).

FOB (Free on board...)

The buyer is at risk when the goods have been delivered onboard the ship at the port of shipment.

Insurance to be covered by the buyer (the seller up to the ship).

CFR (Cost and freight...)

The buyer is at risk when the goods have been delivered onboard the ship at the port of shipment.

Insurance to be covered by the buyer (the seller up to the ship).

CIF (Cost, insurance and freight...)

The buyer is at risk when the goods have been delivered onboard the ship at the port of shipment.

Insurance must be covered by the seller (in favour of the buyer) to the port of destination complying with at least Institute Cargo Clauses (C) or similar clauses (further transports by the buyer).

CPT (Carriage paid to...)

The buyer is at risk when the goods have been delivered to the first carrier or terminal.

Insurance to be covered by the buyer.

CIP (Carriage and insurance paid to...)

The buyer is at risk when the goods have been delivered to the first carrier.

Insurance must be covered by the seller (in favour of the buyer)

to the place of destination complying with at least Institute Cargo Clauses (C) or similar clauses (further transports by the buyer).

DAP (Delivered at place...)

The buyer is at risk when the goods have been placed at his disposal at agreed place of destination ready for unloading.

Insurance to be covered by the seller to the place of destination (further transports by the buyer).

DAT¹⁾ (Delivered at terminal...)

The buyer is at risk when the goods have been placed at his disposal at agreed terminal unloaded.

Insurance to be covered by the seller to the terminal (further transports by the buyer).

DDP (Delivered duty paid...)

The buyer is at risk when the goods have been placed at his disposal at agreed place of destination cleared for import and with duties paid ready for unloading.

Insurance to be covered by the seller. The seller bears the risk during the whole transport.

1) "Named terminal" includes such as quay, warehouse, container yard, road-, rail or air cargo terminal at named port or place of destination.
